

# Report Center

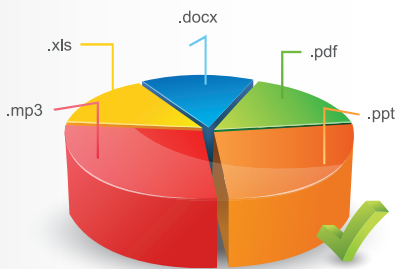

Migrate. Integrate. **Manage. Optimize.** Protect. **Report.**

**Manage. Optimize. Report.** Gain a comprehensive understanding of Microsoft® SharePoint® 2010 usage, topology, performance, and storage trends to generate customizable reports and alerts.

## Key Benefits

- Track, record, and report upon every aspect of platform architecture, activity, and process
- Leverage customizable graphical displays and customizable alerts to analyze trending and proactively respond to issues affecting platform performance
- Discern outliers with real-time, side-by-side difference reports, and track platform performance by monitoring load times of SharePoint sites and other elements
- Monitor and analyze all DocAve infrastructure management processes, including disk space usage, job performance, and topology

**Create customizable, actionable reports to help promote proactive and intelligent SharePoint 2010 management.**

## One Dashboard: Comprehensive Platform Intelligence & Actionable Reporting

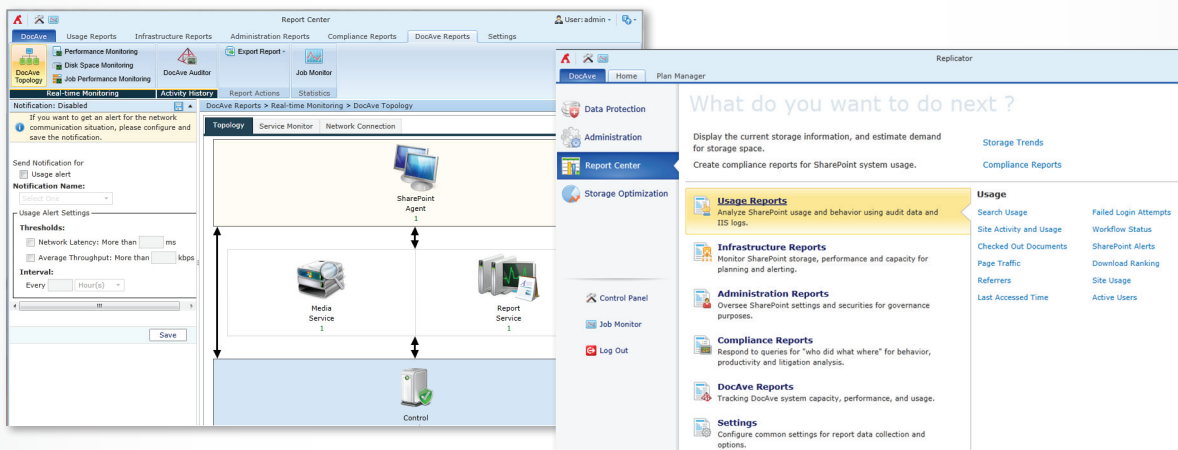

DocAve Report Center for SharePoint 2010 is the industry’s most powerful and flexible SharePoint 2010 intelligence toolkit, providing single-pane access to a wide variety of mission-critical analytics. Administrators can gain a comprehensive understanding of their platform’s topology, usage, and performance trends, and surface content- or user-centric reports for business owners. DocAve’s configurable alerts and notifications based on customizable threshold triggers enable administrators and business owners to make proactive, intelligent management decisions.

## Technical Overview

- Run real-time or scheduled reports to track SharePoint 2010 usage, performance, growth, and health
- Monitor index status, network bandwidth usage, CPU and memory consumption, and more – all from a single, customizable interface – and trend this data over time to discern optimal maintenance schedules
- Trend storage consumption for content databases, web applications, and site collections, even for specific users to identify growth trends and improve capacity planning
- Gain insight into global SharePoint 2010 settings and security, including real-time difference reports to monitor governance policy compliance
- Leverage audit data to track and graphically display platform usage, user activity, and vital analytics – including most frequently accessed content, active users, searched terms, and page traffic
- Configure customizable alerts based on site or content load times, disk space capacity, and CPU usage to proactively address potential performance issues in real-time
- Receive immediate notification if customizable thresholds for growth, usage, or activity are met to speed up response times for addressing performance concerns or non-compliant activity
- Track an item through its entire lifecycle to monitor heavily regulated content
- Audit all DocAve management actions to monitor administrators for policy compliance

Through DocAve's intuitive interface, featuring familiar ribbon-based controls and wizards for step-by-step guidance, build and maintain reports on vital SharePoint statistics.

As with all DocAve products, DocAve Report Center leverages only fully supported Microsoft methodologies and APIs.
